National Student Fee and Support Systems in European Higher Education 2022/2023

Student fees and financial support measures are important instruments to support access to progress and achievement in higher education. In European countries they vary significantly depending on the national policy approaches and criteria.

The purpose of this biennial publication is to present a comparative analysis of European education systems and their specificities with regards to the policies applied to student fees and support.

The publication uses data provided by the 37 Eurydice network member countries through their Eurydice National Units. It is based on official documents issued and/or recognised by top-level authorities. Data were collected in the period June – September 2022.

Overview

Glossary/Functionalities
