

The "Do No Significant Harm" principle

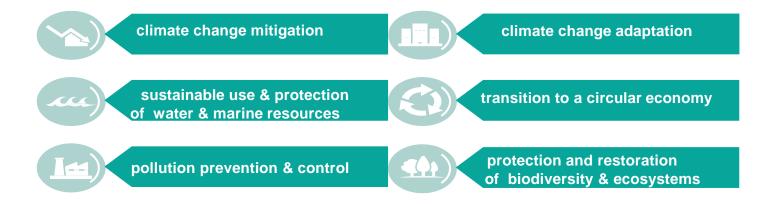

European Commission DG Research & Innovation (Angelica Marino, DG R&I-G2)

Policy issues

Do not significant harm principle (1)

- **Relevance**: In line with the European Green Deal objectives, <u>research and innovation activities</u> **should** <u>comply with the 'do no</u> <u>significant harm'</u> (DNSH) principle according to which the research and innovation activities should not be supporting or carrying out activities that make a significant harm to any of the six environmental objectives, within the meaning of Article 17, on the establishment of a framework to facilitate sustainable investment (EU Taxonomy Regulation)
- <u>Six environmental objectives</u> to which no significant harm should be done:

Policy issues

Do not significant harm principle (2)

- **Scope**: Compliance needs to be assessed both for <u>activities carried out during the course of the project</u> as well as the expected <u>life cycle impact of the innovation at a commercialization stage (where relevant)</u>. The robustness of the compliance must be customized to the envisaged TRL of the project.
- Particular consideration of activities compliance with the DNSH principle is expected for <u>Cluster 4, 5, and 6</u> due to an increase potential of negative environmental outcomes and impacts of projects.
- Impact application and evaluation process: The DNSH principle is addressed in Proposal part B: section 1 Excellence (Methodology) and Proposal part B: section 2 Impact (project outcomes and impacts)
- The DNSH principle needs to be taken into <u>consideration</u> when assessing the methodology and impact of the project. However, compliance is not mandatory unless explicitly stated

Thank you!
