

Kutaisi International University Announces Students Enrolment for 2022-2023 Academic Year

[Kutaisi International University \(KIU\)](#) is announcing enrolment of international students to its English language **Bachelor of Science** programs in **Management, Computer Science, and Mathematics**.

KIU is a new public university in Georgia, and the very first ultra-modern campus-based higher education institution in the Caucasus region. The university provides a modern, broad-based, residential education on a par with leading institutions in the U.S. and Europe. The goal of the university is to be an international hub of education, science, and technology in the region.

KIU campus is located in the city of Kutaisi, the third largest city in the country of Georgia (Sakartvelo). KIU campus is spread out on a beautiful 150 hectares of land in an environmentally clean forest with a river running through it. KIU has opened its doors to the first cohort of students in the fall of 2020. KIU offers dormitories and housing for its students and staff on campus alongside with all the necessary amenities for study, research, and rich student life.

Currently KIU offers three English language Bachelor of Science degree programs, developed, and implemented in partnership with the Technical University of Munich (TUM), rated the Best University in Europe in 2020 by QS World University Rankings. The programs are:

- [Bachelor of Science \(BSc\) in Computer Science](#)
- [Bachelor of Science \(BSc\) in Mathematics](#)
- [Bachelor of Science \(BSc\) in Management](#)

In 2022 KIU officially launches the following academic programs:

- PhD in Mathematics
- PhD in Computer Science
- PhD in Economics
- PhD in Physics
- MSc in Finance & Information Management

A key part of KIU's strategic plan is the opening of world-leading medical and scientific research centers. These will include a KU Hadron Therapy Centre (HTC) housing two cyclotrons, Proton Therapy Clinic for cancer treatment and Cyclotron Research Lab for supporting international collaborative research in Medical and Experimental Physics, Radiation Biology, Chemistry, and multidisciplinary projects.

KIU welcomes international students and launches enrolment for 2022-2023 academic year. The enrolment process will continue until August 2022.

To apply please see more information at www.kiu.edu.ge or contact us at tel: +995 599 272 278 or email: international@kiu.edu.ge.

The main mega-project of regional importance of the education and science system of Georgia is Kutaisi International University. The university has a rapidly growing rating. Based on the results of the Unified National Examinations of 2021, according to the average competition score, Kutaisi International University takes the leading place among the state universities.

The goal of Kutaisi International University (KIU) is to gradually become an international center of education, science, and technology in the region. From 2020, KIU is initially offering English language bachelor programs in Computer Science, Mathematics and Management to students. From 2022, KIU will officially offer students a master's program in finance and information management and doctoral programs in computer science, mathematics, economics, and physics. The task of the University is to prepare a highly qualified workforce and human capital, which will contribute to the economic growth and development of Georgia and the region.

Cartu International Charitable Foundation is investing more than one billion euros in the development of Kutaisi International University in the form of philanthropy.

In the field of research, the strategy of Kutaisi International University envisages the development of research infrastructure equipped with modern and state-of-the-art technologies. Based on the above infrastructure and laboratories, undergraduate, graduate, and doctoral programs will be developed by attracting relevant science and leading experts in the KIU.

As part of the strategic development plan, establishment of hadronic therapy center has been started. The research center will be able to conduct scientific research in elementary particle physics, radiation physics and biophysics. The research center will also support the establishment of a Proton Therapy Center, in conjunction with the KIU Faculty of Medicine.

KUTAISI INTERNATIONAL UNIVERSITY (KIU) OFFERS:

- **International standard English language
BSc programs in:**
 - Management*
 - Computer Science*
 - Mathematics*
- **Georgian and foreign faculty**
- **Rich student life activities**
- **Beautiful campus with dormitories**
- **Scholarships**
