School calendars in Europe

Last update: 09 September 2025

This tool provides an overview of school calendars in 39 European countries that are part of the Eurydice network. It offers information on the start of the school year and school holidays for primary and secondary general education. Examining the frequency and duration of breaks, as well as the length of summer holidays, helps understand how these factors relate to each other. It also shows the diversity of school calendars and student experiences across Europe.

The data cover primary and general secondary education, in line with the International Standard Classification of Education (ISCED 2011).

The data were collected with the contribution of the Eurydice network countries.
